2. Definitions

The following terms have specific meanings within this policy. Consistent terminology is used throughout this document. Readers and automated systems should not substitute synonyms or infer alternate meanings.

Pre-existing Condition:

Any illness, injury, or medical condition -- whether diagnosed or undiagnosed -- for which the Policyholder or a covered dependent received medical advice, diagnosis, care, or treatment within the 24 months immediately preceding the Effective Date of this policy. Pre-existing conditions are subject to a 24-month waiting period before benefits become payable.

Waiting Period:

The specified duration immediately following the Effective Date during which no benefits are payable for certain conditions: (a) 30-day general illness waiting period for acute illnesses; (b) 24-month waiting period for pre-existing conditions; (c) 9-month waiting period for maternity benefits (if Maternity Rider is elected). The waiting period does not apply to accidents.

Network Provider:

A physician, hospital, specialist, or other healthcare facility that has executed a participation agreement with MediShield Health Insurance Ltd. to provide covered services at negotiated rates. In-Network services result in lower cost-sharing for the Policyholder. A current Network Provider directory is available at www.medishield-insurance.com/find-a-provider.

Out-of-Network Provider:

A healthcare provider that has NOT executed a participation agreement with MediShield. Services rendered by Out-of-Network Providers are covered at reduced rates as specified in the Schedule of Benefits, and higher cost-sharing applies. Emergency services are always covered regardless of network status.

Cashless Authorization:

The process by which a Network Provider submits a Pre-Authorization Request to MediShield before or at the time of admission, requesting approval to render services without requiring the Policyholder to pay at the point of service. MediShield settles the approved amount directly with the Network Provider. Cashless Authorization is not available at Out-of-Network Providers.

Day Care Procedure:

A medical or surgical procedure that, due to technological advances, requires less than 24 hours of continuous hospitalization. Day Care Procedures are covered under inpatient benefits despite not requiring an overnight stay. Examples include cataract surgery, chemotherapy sessions, hemodialysis, and laparoscopic procedures completed within a single day.

Room and Board Limit:

The maximum daily allowance for inpatient hospital room and board charges, including nursing care, routine medications, and standard meals. Under the MediShield Gold Plan, this limit is the cost of a standard single private room at a Network Provider. Charges for suites or premium rooms that exceed this limit are the Policyholder's responsibility.

Medically Necessary:

A healthcare service, treatment, procedure, equipment, or supply that a licensed physician determines is required to diagnose or treat a covered illness or injury, is consistent with the symptoms or diagnosis, is not primarily for the convenience of the Policyholder or provider, and meets generally accepted standards of medical practice. MediShield's Medical Review team may verify medical necessity.

Deductible:

The fixed dollar amount the Policyholder must pay out-of-pocket for covered services before MediShield begins to pay benefits. Deductibles reset on the first day of each policy year. Preventive care services are not subject to the deductible.

Coinsurance:

The percentage of covered expenses the Policyholder pays after the deductible has been satisfied. For example, 20% coinsurance means MediShield pays 80% and the Policyholder pays 20% of covered charges.

Copay:

A fixed dollar amount the Policyholder pays at the time of service for specific covered services (e.g., $25 PCP copay, $60 Specialist copay). Copays do not typically count toward the deductible but do count toward the out-of-pocket maximum.

Out-of-Pocket Maximum:

The maximum total amount the Policyholder pays in a policy year for covered services, including deductibles, copays, and coinsurance. Once this limit is reached, MediShield pays 100% of covered in-network charges for the remainder of the policy year. Premiums and non-covered services are excluded.

* Upon discharge, review the final itemized bill, sign the Policyholder Discharge Acknowledgment form, and retain a copy for your records.
* MediShield will settle the approved amount directly with the Network Provider within 15 business days of receiving the complete final bill.
* Any charges not covered or in excess of approved amounts remain the Policyholder's responsibility and are due directly to the Provider.
